**Written Responses**

**What was the most important thing you learned during this event?**

1. That there will be 400 parking spaces
2. Details, timeframes
3. That the plan is going the way I wanted to see it. It will be a real asset to Greenville.
4. See overall plan
5. Why some uses were rejected despite being chosen by citizens.
6. Still in the planning stage. Many decisions yet to be made.
7. The overall of the information was very good.
8. How the city appreciates and respects community input!
9. Keeping everyone informed.

**Additional comments or ideas for the proposed city park:**

1. This is historically an older area, homes, etc. The park should fit this.
2. Would u consider a small tennis court in the park; for some of us who are avid fans
3. Great process!
4. Begin to use the land on the north side of the river ASAP—such as for community gardens and other inexpensive (non-facility) purposes.
5. The park does not address the needs of our teens in this community. I still want us to consider a skate park for our teens and a basketball court.
6. Looks very good.
