Supporting Documents	Comments
What is the zoning designation for the location of the proposed facility?	
Is the site located in a City-designated Supplemental Review District?	
Explain the purpose of the proposed facility and describe the physical work to be performed, including the potential impact of the work on the surrounding area.	
Provide construction drawings with site plan (must include sufficient detail to determine compliance with safety and design requirements, including the Manual on Uniform Traffic Control Devices and proposed use of the ROW).	
Provide structural analysis with calculations or certification of compliance with applicable codes, including structural integrity and weight-bearing capacity from an engineer licensed in SC.	
Provide photo sims that accurately depict both the existing conditions and the “as-built” appearance of the facility.	

City of Greenville South Carolina Wireless Facilities in the ROW Application

<p>Provide the approximate horizontal and vertical locations of the proposed facility relative to the boundaries of the ROW.</p>	
<p>If the application is for the installation of a new or replacement pole, provide certification, based on the assessment of an engineer licensed in SC, that the WSP cannot meet the service objectives of the application by collocating on an existing pole or support structure, where collocation would be technically feasible and would not impose significant additional costs.</p>	
<p>Provide certification that the WSP has obtained approval from the third-party Potential Support Structure owner.</p>	
<p>Has the WSP applied for an electrical permit from the City?</p>	
<p>Non-WSP applicants must attest that a WSP has requested, in writing, that the applicant collocate the facility or install, modify or replace the pole at the requested location.</p>	

City of Greenville South Carolina Wireless Facilities in the ROW Application

Provide certification by an Radio Frequency (RF) engineer that the proposed facility will comply with FCC RF standards and a description or depiction of the relative horizontal and vertical RF emissions (must be submitted prior to operation of the proposed facility).	
Provide certification of surety bond, insurance and indemnification requirements.	

By signing below, the applicant's representative hereby certifies that the applicant agrees to pay applicable fees and rates, repair damage and comply with all nondiscriminatory and generally applicable right-of-way requirements for deployment of any associated infrastructure that is not a small wireless facility.

Fees for Application	
\$100 for each site for the first 5 sites collocating on existing poles or support structures	
\$50 for each additional site collocating on existing poles or support structures	
\$1,000 to collocate on a new pole	
\$250 to collocate on a modified or replacement pole	
Total Application Fees
